Student of the Faculty of Military Education

**Annotation:** Is there a blessing more precious in this world than the peace and tranquility of the motherland?! More courageous than to protect him? The military is literally the epitome of such courage and fortitude. This profession requires true patriotism, dedication, and strong will. The military is the guarantee of our peaceful, medicated, prosperous life today. As long as they exist, our country is peaceful, the sky is clear and our borders are strong. That is why the military is called the profession of the brave, and the defenders of the Motherland are always glorified and honored. This article discusses the responsibilities of being in the military and the opportunities offered to honorable professionals.

**Keywords:** military, responsibility, honorable profession, opportunity, position, patriotism, courage, bravery, national defense.

In his congratulatory message to all members of the Armed Forces of the Republic of Uzbekistan on the occasion of the Defender of the Fatherland Day, President Shavkat Mirziyoyev said: "*We are justifiably proud of the heroic sons of our country,*" he said, acknowledging the hard work and courage of our servicemen.

In his congratulatory message, the head of state also touched upon the large-scale work carried out in the Armed Forces over the past four years. In particular, four years ago, Uzbekistan identified the most important and priority areas for radical reform of the military construction sector, on the basis of which our country is carrying out large-scale work to strengthen its defense capabilities and develop our Armed Forces. Indeed, in the recent past, a new Defense Doctrine has been adopted, the composition and functions of military structures have been thoroughly reconsidered, the army management system has been improved, and the National Army has been provided with modern weapons and equipment. Important projects have been implemented.

Speaking about the establishment of a unique system for the first time in our history - the military-administrative sector, the head of state said that this method of work allowed to actively involve local authorities in strengthening the country's defense capabilities. Most importantly, it serves to put into practice the great idea that "the army and the people are one body and one soul."

In his congratulatory message, the Uzbek leader also noted that this year has been a test for our country. Indeed, 2020-2021 has been a test year for the whole world, especially for Uzbekistan. As if the coronavirus pandemic was not enough, the natural and man-made disasters in Bukhara and Syrdarya tested the resilience of our people. The congratulation rightly acknowledged the work of the military, which contributed to the elimination of these disasters. Even in such a difficult situation, the Military Medical Academy of the Armed Forces was established. This new academy, which is unique in our region, serves to train highly qualified and specialized personnel in the field of military medicine, involved in the response to emergencies.

Today in our country special attention is paid to the issue of social support of servicemen and their families. New housing for the military, the creation of many new jobs for their families, the employment of more than 3,000 military retirees, the state to provide higher education for more than a thousand children of servicemen. The fact that grants are allocated is proof of our opinion.

It should be noted that the results achieved in this area today are an important basis for the Action Strategy for the further development of the Republic of Uzbekistan, adopted almost four years ago at the initiative of the President. This is because the fifth priority of the Action Strategy is to protect the constitutional order, sovereignty, territorial integrity of the Republic of Uzbekistan, strengthen civil, interethnic and interfaith peace and harmony and the state's defense capabilities, increase the combat power and capacity of the Armed Forces of Uzbekistan. important tasks.

**In conclusion**, it can be said that the State Programs adopted annually on the basis of the Action Strategy set many tasks related to the reform of the defense system and ensure their consistent implementation. We believe that the State Program to be adopted in 2021 will also include important tasks in this area, which, in turn, will serve to raise the defense potential of our country to another level. Also, the military is a truly honorable profession. We see that people who are ready to defend the country and have a burning love for the homeland in their hearts have always been an example to others. In turn, these professionals must always be responsible for their profession.
