

## Methods of formation of patriotic feelings in youth

**Karshiyev Azamat Rakhmonovich**

Teacher of methodological training cycle at Nizami Tashkent

State Pedagogical University, Faculty of Military Education

### **Annotation:**

Motherland is the holy land where a person is born. By homeland, we mean the motherland, where our parents and descendants shed their navel blood. In order to deeply feel the homeland, it is necessary to know, respect, value and strengthen the examples of patriotism of the people. These feelings, these beautiful high human qualities are a true example of patriotism for our freedom day. That is, the nation is the support of the Motherland.

**Keywords:** loyalty, universal feeling, spiritual values, inviolability of the territory, love of country, homeland defense, patriot.

It is very difficult to write about the homeland. One cannot feel the Motherland without feeling the Motherland in the heart. Sometimes they say, "A person who has worked in a foreign country knows the value of his homeland." In fact, a person who truly loves his homeland can live in it and fully understand the country's value. In order to feel the homeland deeply in his heart, it is necessary to know, respect, appreciate and strengthen examples of patriotism of people. These feelings, these beautiful high human qualities are a true example of patriotism for our freedom day. That is, the nation is the support of the Motherland. Patriotism means loving one's people, being proud of them, respecting and appreciating them. Therefore, it is important not to forget the great compatriot scholars, thinkers, hadiths and sultans of mysticism who made a great contribution to the development of the world with their thinking and intelligence. The sense of homeland means to live with high faith in our dear and beautiful country, to always be a true child of it. It is impossible not to miss it if it is far away. Another difficulty in writing only about the Motherland is that often one cannot find the words to describe or praise one's heart. Therefore, I would like to see love and respect for the Motherland not in silence, but first in practice, in good deeds. I thought that the Motherland is a handful of soil. Later, I realized that there is a lot of wisdom in this handful of soil, and nothing can be exchanged for my grandmother's yard. Today, when I write about my homeland, I remember those times. I can't help but think that Uzbekistan is my homeland! We have no right to betray our country! I realized that the wonderful days of my childhood are about to begin. I repeat, these are kind people around us, they teach us to love and respect our country! A human child is thirsty for love for a lifetime. Invisible ties encourage us to live side by side with good people, to work hard, to strive for a hot and exciting life. Independence is the return of your space, your glory, your freedom, your mother tongue, your

national history, your religion, your identity! These are not just loud words. A call to the mind and heart of every person who was born and raised in this country, who eats and drinks the water of this country! The homeland begins at the threshold. When a person is born, his duties and responsibilities to his country are with him. Everyone should live his life not as the country gave me, but as I gave to my country. The child perceives the external environment from the mother's womb. According to experts, it is useful for a pregnant woman to read more about different countries. It is also appropriate to inculcate the feeling of love for the Motherland in the unborn child even before he is born. They compare the motherland to the mother. We have come across the phrase "motherland" in many literatures. How dear our mother is to us. "Heaven is under the feet of mothers," they say. Our life is short to pay off the debt our mothers gave us. Homeland is a priceless wealth for a person. The presence of the homeland gives a person unparalleled strength and power. This feeling is deeply rooted in people's hearts. That is why there is a person who loves and respects the Motherland and would not exchange it for any wealth. From this point of view, the changes taking place in our country, its history, the rich heritage of the people, the essence of national and universal values, our republic. A person who does not show examples of self-sacrifice in order to achieve high prospects, with a deep understanding of his capabilities, will not be a true patriot. Historical and cultural heritage awakens a sense of patriotism and nationalism in a person. It creates a feeling of striving to be a generation worthy of the ancestors. Cultural heritage perceived through historical thinking shows great spiritual power, wealth, and talent. Our people are living a peaceful life with noble and noble goals, relying primarily on their own strength and capabilities, and a democratic country. Relying on our ancient values and taking into account the experience of developed countries, we live with promising and noble aspirations, we build the free, free and prosperous life that our people have longed for for centuries, and the fact that the international community recognizes all our capabilities and the achievements we are making on this path is the honor of independence. To know one's country is to know one's self, to understand how each person is related to the whole of humanity. Homeland is unique, therefore it is sacred. Only to respect the motherland, the mother, the sky, the sun... In many ways, we compare the motherland to the mother. Because in this world we cannot find a greater person than our respected mother. This is our second home, our place of worship. The word motherland always comes together with the word mother. It is not a mere metaphor, but merely an adjective. The Motherland is in harmony with the mother who created a miracle like the birth of a human being. Homeland, like mother, is a place of miracles in human destiny. Therefore, two miracles are invoked side by side. The more a person is devoted to his mother, the more love, respect, kindness, care, care, protection from various disasters and enemies. If necessary, he will sacrifice his life for the Motherland. When the munificent and venerable Mother brings a person into this bright world, the Motherland educates him in the wave of life, raises him, shows him as a human being. Therefore, there is no place for a greater,

greater, more valuable person than the Motherland. In addition, the feeling of love for the motherland enters the blood through mother's milk. This sacred feeling is nurtured by the mother goddess. The feeling of homeland enters everyone's blood with the mother goddess, poems and songs that she heard as a child. When a sense of patriotism is formed from infancy, it lasts forever. Patriotism is the most important component of the moral formation of an individual. That is why when a child's sense of patriotism is formed from infancy, it lasts forever. Therefore, it is advisable to combine the following in each person from an early age. Loyalty is the devotion and courage that comes from understanding a person homeland, his duty to those who believe in him and those who love him. There is no one in this world who does not love and dream of his homeland, his homeland. he leaves his homeland. Loyalty and devotion in the human heart come from love for ones homeland.

After all, independence has opened a wide way for us to determine our own destiny, to do great things today and tomorrow. It gave back our will, our religion, our history. We have become free to express ourselves. Thankfully, the great creative and renewal changes that have taken place in our country over the past three years have changed the lives and thoughts of each of us. We have learned to work for a truly bright country with a bright future. Nothing happens by itself. No one will come and create good conditions for us. Therefore, every citizen of our country should contribute to the great and noble deeds carried out by the President of our country. The homeland is the land where the ancestors lived, where the people grew up, where its language, history, culture, customs and values are formed, grow and develop. It is the childhood duty of each of us to cherish it. At a time when globalization is taking place in the world today, there are also some worrying processes, such as the spread of ideas that promote statelessness and bigotry. At the same time, one of the most important tasks before us is to educate the younger generation in the spirit of devotion to the motherland. it is necessary to awaken and form in them the ideas of acquaintance, understanding of the homeland, national pride, knowledge of the history of the homeland. It is difficult to imagine the homeland without the people. The most important thing in achieving independence is the ability of our people to persevere in the pursuit of their goals based on their patience, wisdom, tolerance, diligence and creativity. It is necessary to rely on such immortal values as spirituality, morality, enlightenment in inculcating patriotism in the youth. These three great values have always been respected by our people for centuries. Both our sacred religion and the philosophy of the whole East glorified these values, considering them the most important conditions for social development.

The motherland is compared to the mother. In many literatures, the phrase "motherland" is often used. How holy our mother is to us. The hadith also says, "Paradise is under the feet of mothers." Our lives are not enough to pay off the debt that our mothers have given us for so long. A mother is not only physically but also mentally exhausted to give birth to her child. Our holy religion, Islam, also emphasizes our duty to mothers. Our duty and duty to our

mother must be in harmony with our love for the Motherland. We were born and raised in this dear Motherland, let's do our best for the development of our Motherland. We feel it is our duty to love him and cherish him like the apple of our eye. In some lands, marital discord is the order of the day. This evil has not bypassed our country. As a result, babies are becoming orphans. This has a serious impact on the future of children. It is obvious that an orphaned child is mentally retarded and people of different purposes try to fill the gap. Let's fill this gap in the spirit of patriotism. Let's be kind to each other. Let the children see the love in the family and give their love to their homeland. In conclusion, we would like to emphasize that this dear and sacred Motherland is inherited from you and our ancestors. Motherland, to sacrifice our lives for the protection of the Motherland. In conclusion, I would like to emphasize that this dear and holy homeland was not built for us yesterday or today. This sacred homeland is inherited from great ancestors. Therefore, it is the duty of all of us to make our contribution to the development of the country as much as possible. It was when I was able to make a small change in the life of my country through this checkpoint. For me, this would be the region of greatest happiness.
